XV.—METEOROLOGICAL STATISTICS.

No. 42.—Notes on the Rainfall of Western Australia for January, February, and March, 1923.

January.—The earlier half of January was characterised by ordinary summer rains in the North-West and Kimberley, missing the Ashburton and West Gascoyne districts, but extending in a lighter fashion Southward to the Northern portions of the East Gascoyne, and also the Coolgardie Goldfields. The agricultural country, where rainfall was badly needed for stock and domestic purposes, experienced a very dry spell.

Evidences of a willy-willy were noted on the Weather Chart as early as the 13th. The centre of the system kept well out to sea, and until the 16th the rainfall was confined to passing thunderstorms. The disturbance then moved coastwise, and its centre was located off Onslow, where the wind reached hurricane force, and at the same time extensive rains developed through the West Gascoyne, eventually extending throughout coastal and agricultural districts, and, in much lighter fashion, through the East Gascoyne and Coolgardie Goldfields. Unfortunately the extreme eastern agricultural areas and the Midland country participated only to a very slight extent, but in the Quairading, Corrigin, and Narrogin areas very many falls of over an inch were noted. While this disturbance was operating over Southern areas, rainfall slackened off considerably in the tropics, but towards the end of the month heavy thunderstorms again became frequent, and on the closing day extended to portions of the West and East Gascoyne and through the Midland country.

Taken as a whole, the month's rainfall was above normal in the West Kimberley and inland North-West, but below at most of the East Kimberley and North-West Coastal stations. In the West Gascoyne many of the falls on the 17th easily represented absolute maxima for the 24-hour period. At the Junction the month's excess amounted to 8 inches, and at Carnarvon to 5.83 inches. The excesses in the inland North-West extended Southward to Mundiwindi and Three Rivers, but defects were general over the remainder of the East Gascoyne and Murchison, while very variable results were obtained over the Coolgardie Goldfields and agricultural districts, substantial excesses alternating, in many instances, with aggregate falls of only a few points.

February.—February was a very disappointing month from a rainfall point of view. Excluding a few isolated stations in the Eastern wheat belt, where local thundershowers fell, a general deficiency was indicated on the month's Rain Map.

In the tropics the falls occurred in the form of patchy thunderstorms, chiefly of a light character, and the aggregates for the month, apart from one or two localities, ranged from one inch to nearly 6 inches below the average, while very few of the individual gaugings over the remainder of the State exceeded half an inch. Many stations, in fact, did not register a single point.

March.—The distribution of rainfall during the month of March was closely connected with the movements of three depressions more or less resembling the willy-willy type, but of considerably less intensity, though greater extent, than the regular willy-willy. The first, which pursued a track lying far out to sea, had already passed beyond the tropic at the commencement of the month, but scattered rains, very patchy in character, lingered in the North-West and Gascoyne, and extended later through the Coolgardie Goldfield, chiefly in a light fashion.

The second occupied the period 8th-11th. This system spent itself off the Kimberley coast, and heavy rains was confined to the Kimberley districts (5.64 inches at Fitzroy Crossing). Associated with it was the disastrous hurricane at Wallal, which apparently was a purely local "cockeye" on the fringe of the depression.

The track of the third system was very distinctly shown on the weather charts. It was the storm in which M.S. "Kangaroo" experienced a severe handling off Onslow, and retained its vigour to an unusual degree after passing into sub-tropical latitudes.

The rainfall was heavy along the whole North-West, West, and South-West coast-lines of the State, reaching a maximum of over 12 inches at Onslow, but it fell off rapidly with every mile from seaboard, and at 100 miles inland only trivial showers were recorded. The gales accompanying the storm were felt, however, at a greater distance, one of the most severe being reported from Kumminin, about 180 miles from the coast.

As this was the only heavy rainfall South of the Tropic, the rain-map, as would be expected, showed a region of excess above the monthly average embracing most of the West and South-West coast localities and extending inland to the Great Southern country.

Several localities on the Coolgardie Goldfields also recorded excesses, but in general that part of the State showed a deficiency.

No. 42.—Notes on the Rainfall of Western Australia for January, February, and March, 1923.—*continued.*

The tropics, with few exceptions, experienced a very good month, in which the Northern half both the East and West Gascoyne participated. The total at Onslow, 13.78 inches, is an absolute record for that station for any month since the inception of records in 1886. Summed up, it may be said that the effect of the month's rainfall in the Northern areas of the State has been to make good the deficiencies in the areas missed by the rather patchy rains during the earlier months of the season. The only portion of the North-West which has not received good rains at some time during the summer is the strip of coastline between Port Hedland and Condon. The Marble Bar-Nullagine country was considerably in defect for the month under review, but it will be remembered that excellent rains fell there in January. Unfortunately nothing beyond scattered thunderstorms reached the Archison and the Southern portion of the East Gascoyne, where an acute water shortage continued.

| Ballot Papers issued ... | 48,436 | 36,707 | 85,143 | Aggregate ... | 39,875 | | 38,242 | | |

Result: Resolution A carried in 32 Licensing Districts by a total of 6,401 votes.
Resolution C in 10 Licensing Districts by a total of 4,768 votes.

On the two questions—(1) Whether new Publicans' General Licenses were to be held by the State, and (2) Whether State Management should obtain throughout districts, the voting resulted as follows:—(1) 23 districts voted "Yes" with an aggregate majority of 6,452 votes, 14 voted "No" with an aggregate majority of 675 votes; the total votes recorded numbered 54,531; (2) 23 districts voted "Yes" with an aggregate majority of 5,110 votes, 19 voted "No" with an aggregate majority of 1,133; the total votes recorded numbered 53,853.
